Recent Highlights

- The Company's operational portfolio generated £19.3m of revenue during the period, amounting to £12.2m in operational EBITDA;
 - Total portfolio revenue per MW per hour was £15.10 with non-GB assets achieving 2.6x more revenue than the GB portfolio, showcasing the benefits of the diversification strategy;
 - GB revenue: £7.54/MW/hr
 - Non-GB revenue: £19.66/MW/hr
- The 79.9 MW Stony asset was energised during the reporting period.
- The Company's cash balance as of 30 September was £75.0m with a further £13.9m across its subsidiaries, sufficient to meet all outstanding contractual

commitments.

• As at 30 September, Fund level gearing remained at 0%.

Net Asset Value (NAV):

- NAV as of 30 September 2023 was £543.3m or 112.9 pence per share, bringing NAV total return since IPO to 48.8%.
- NAV per ordinary share decreased by 2.3% to 112.9p (115.6p as at 31 March 2023).
- Portfolio valuation increased by 8%.
- The Company continued to demonstrate strong operational performance.
- Adjustments to short-term inflation and discount rates (+ 25bps) were made in response to the macroeconomic landscape and were the primary drivers of the decrease in NAV during the period.

Overview

During the period, the Company benefitted from strong performance across the international portfolio, which delivered 2.6x higher revenues than the Great Britain (GB) assets alone. Revenue generation over the summer months was particularly good, with the operational Texas assets delivering the highest monthly revenue achieved in the Company's history. Selection of new RTMs in multiple markets allowed the Company to access new revenue streams and increase participation in wholesale trading as part of a more diverse strategy. The Company also increased its energised capacity with the addition of Stony during the reporting period. Adjustments to short-term inflation and discount rates (+ 25bps) were made in response to the macroeconomic landscape, resulting in a decrease in Net Asset Value (NAV).

Debt facility

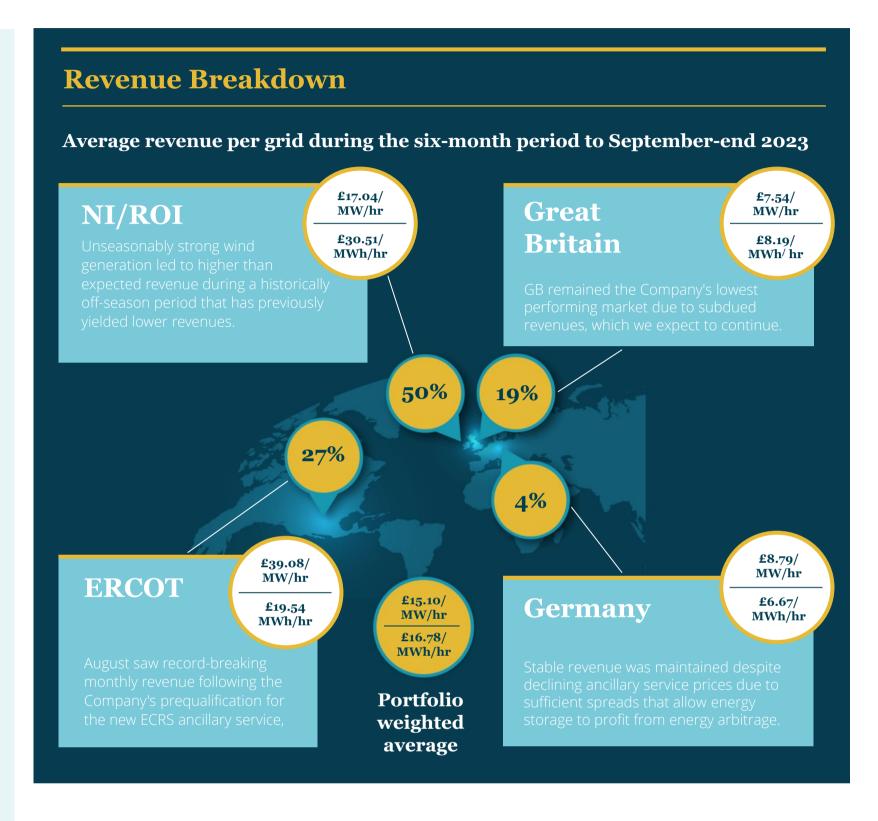

Additional project level debt funding of \$60.0m for the Big Rock project secured via a loan from First Citizens Bank. Between the Santander and First Citizens facilities, GSF has total debt availability of c.£99.0m. If fully drawn, this would represent c.15% of GAV.

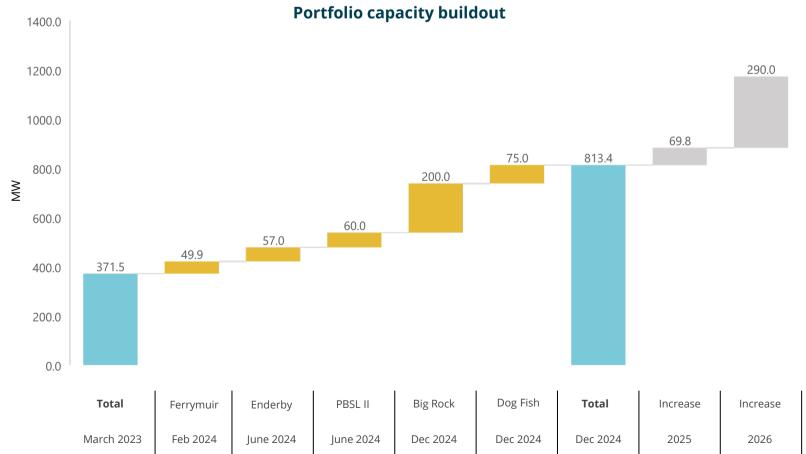

Construction milestones

As at the date of publication, the Company's operational capacity had grown by 79.9 MW vs March-end.

Key NAV Drivers

Inflation and discount rate movements were the primary drivers of NAV during the quarter and reflect the macro environment in which the Company operates.
